With great excitement, I present the first editorial of *Trends in Toxicology*. This journal is dedicated to showcasing pioneering research and forward-thinking methodologies across the vast and dynamic field of toxicology. Our mission is to provide an essential platform for scientists, researchers, and practitioners worldwide to share their findings, foster scholarly dialogue, and contribute to the collective advancement of toxicological science.

Why “Trends in Toxicology”?

Toxicology is a field in constant evolution. As new technologies develop and our understanding of chemical, biological, and environmental toxicants deepens, the need for a dedicated platform to highlight these advances has become increasingly crucial. *Trends in Toxicology* aims to bridge this gap by focusing on emerging research areas, transformative discoveries, and innovative approaches redefining the field. Our goal is to feature a diverse spectrum of studies, ranging from the molecular and cellular mechanisms of toxicity to the broader impacts of pollutants on ecosystems and human health. We particularly seek research that challenges conventional boundaries, integrates interdisciplinary insights, and employs novel methodologies to deepen our understanding of toxic substance interactions with biological systems.

What to Expect from This Journal

Readers can look forward to a broad array of articles reflecting the expansive scope of modern toxicology. This includes studies on innovative experimental techniques, environmental toxicology, toxicogenomics, human health implications, and emerging contaminants. Our publication aims to highlight work that not only advances fundamental knowledge but also has practical implications for environmental and public health.

Looking Ahead

As we embark on this journey, we are dedicated to creating an inclusive and collaborative space for toxicologists across the globe. We encourage contributions from all regions, particularly welcoming early-career researchers and those from underrepresented areas. Our editorial board, composed of distinguished experts spanning the spectrum of toxicological disciplines, is committed to rigorous peer review and the dissemination of high-quality, impactful research.

Join Us on This Journey

We invite you to become an active part of this new venture. Whether through submitting your work, participating as a reviewer, or engaging in the exchange of ideas and debate, your involvement is vital to the growth and success of *Trends in Toxicology*. Together, we can shape a journal that not only reflects the present state of the field but also sets the course for future advancements.

On behalf of the entire editorial team, thank you for joining us in this exciting journey. We look forward to your contributions and to the valuable discussions and breakthroughs that will unfold within the pages of *Trends in Toxicology*.
