It is with immense pride and enthusiasm that we introduce the inaugural issue of *Ecological Economics and Management (EEM)*. This milestone signifies the launch of a dynamic, open-access platform dedicated to fostering interdisciplinary dialogue and actionable solutions at the nexus of ecological sustainability, economic systems, and management innovation. As a gold open-access journal, *EEM* prioritizes equitable global access to cutting-edge research, ensuring that knowledge transcends boundaries to address pressing environmental and socio-economic challenges.

EEM is rooted in the belief that sustainable futures demand integrative approaches. Our scope spans theoretical advancements, empirical studies, and policy-oriented research that bridge ecological integrity with economic viability. We welcome contributions that tackle urgent issues such as climate resilience, circular economy transitions, and equitable resource governance, while also embracing emerging frontiers like digital sustainability and blue economy strategies.

The journal invites original research across a broad spectrum of topics, including but not limited to:

- Sustainable Development
- Environmental Policy and Governance
- Resource Management
- Green Business and Corporate Sustainability
- Circular Economy
- Ecological Economics Models and Frameworks
- Environmental Finance and Economics
- Climate Change and Adaptation
- Sustainable Agriculture and Food Systems
- Social Dimensions of Sustainability

By integrating diverse perspectives, *EEM* aims to address complex, interconnected challenges with scholarly rigor and practical relevance.

As we embark on this journey, we are confident that *EEM* will emerge as a cornerstone for interdisciplinary innovation. Together with our authors, reviewers, and the dedicated team at *Scilight Press*, we aim to catalyze transformative research that informs policy, empowers communities, and redefines sustainable development paradigms.
